UK PRETERM BIRTH CONFERENCE
18–19 JANUARY 2027

**Instructions for Plenary and Keynote Speakers**

Thank you for agreeing to participate in the UK Preterm Birth Conference 2027. To ensure consistency across the conference programme, website and promotional materials, please submit the following information.

**Required Information**

1. **Title, First Name and Last Name**

Please provide your preferred professional title and full name.

**Example:** Professor Anna David

2. **Primary Affiliation**

Please provide your current institution, organisation or company.

**Example:** EGA Institute for Women's Health, University College London (UCL)

3. **Title of Keynote or Plenary Presentation**

Please provide a concise title (maximum 20 words).

**Example:** Improving the Health of Women: A BioMedEng Call to Action

4. **Biography (200–300 words)**

Provide a short professional biography written in the third person. The biography should include:

- Current role and affiliation
- Academic, clinical or professional background
- Major leadership positions
- Key research interests or areas of expertise
- Significant achievements, awards or contributions
- Relevance of your work to the conference theme

Please avoid including a full CV.

Queen Mary University of London | Est. 1785

**Example opening:** "Professor Anna David is Professor and Consultant in Obstetrics and Maternal Fetal Medicine and Director of the Elizabeth Garrett Anderson Institute for Women's Health at University College London."

5. **Presentation Abstract (150–250 words)**

Provide a brief summary of your presentation, outlining:

- The topic and scope of the presentation
- Key scientific, clinical or policy challenges
- Recent advances or emerging opportunities
- Relevance to maternal, fetal, neonatal or population health
- Key messages for conference delegates

The abstract should be written for a multidisciplinary audience including clinicians, researchers, engineers, policymakers, trainees and patient representatives.

6. **Photograph**

Upload a recent professional headshot photograph suitable for publication on the conference website and promotional materials.

Recommended format:

- JPEG or PNG
- Minimum 1000 × 1000 pixels
- High resolution

7. **Social Media and Website Links (Optional)**

Provide any professional links you would like included in conference communications within the Biography:

- Institutional profile
- LinkedIn, X (Twitter)
- Research group website
- ORCID

UK PRETERM BIRTH CONFERENCE
18–19 JANUARY 2027

---

**Example Speaker Profile**

**Title, First and Last Name:** Professor Anna David

**Primary Affiliation:** EGA Institute for Women's Health, UCL

**Title of Talk:** Improving the Health of Women: A BioMedEng Call to Action

**Biography:**
Anna David is Professor and Consultant in Obstetrics and Maternal Fetal Medicine and Director of the Elizabeth Garrett Anderson (EGA) Institute for Women's Health at UCL (@PrenatalTherapy). The Institute renewed its Athena Swan Gold Award in 2023 under her leadership. Her research focuses on translational medicine and the development of prenatal therapies for life-threatening disorders including preterm birth and fetal growth restriction. She leads the UCL Centre for Prenatal Therapy, serves as Deputy Director of the Tommy's National Centre for Preterm Birth Research and coordinated the introduction of open fetal surgery for spina bifida in the UK. Her work combines clinical innovation, translational science and multidisciplinary collaboration to improve outcomes for women and babies worldwide.

**Presentation Abstract:**
Women's health remains a major global challenge with persistent inequalities in access, outcomes and innovation. This keynote presentation will explore how advances in biomedical engineering, translational medicine and digital health technologies can transform the prevention, diagnosis and treatment of pregnancy complications. Drawing on examples from fetal therapy, preterm birth prevention and placental research, the talk will highlight opportunities for multidisciplinary collaboration to improve maternal and neonatal outcomes. The presentation will also discuss how engineering solutions can help address disparities in women's health and accelerate the translation of scientific discoveries into clinical practice.

UK PRETERM BIRTH CONFERENCE
18–19 JANUARY 2027

**Important Dates**

**Abstract Submission Opens:** 1 June 2026

**Abstract Submission Deadline:** 30 June 2026 (23:59 BST)

All abstracts must be submitted electronically via the conference website:

https://pretermconference.com/

**Conference Programme Announcement:** 31 October 2026

**Conference Registration Deadline:** 1 December 2026

**UK Preterm Birth Conference 2027:** 18–19 January 2027
People's Palace, Queen Mary University of London, UK

*We encourage early submission and look forward to receiving your contributions from clinicians, scientists, engineers, healthcare professionals, policymakers and patient advocates working to improve outcomes for mothers, babies and families affected by preterm birth.*

***Dr Tina Chowdhury, Chair, UK Preterm Birth Conference***

Queen Mary University of London | Est. 1785
